Head Box S2 Digital

Headphone amplifier and DAC with 32bit and DSD256 support

- High end ESS Sabre ESS9038 DAC
- · Proprietary clock circuity design
- Organic polymer capacitors and thin film miniMELF resistors
- 32bit / 768kHz decoding
- DSD64, DSD128 & DSD256 (DSD over PCM)
- Up to 24bit/192kHz for optical & coax inputs
- 5 selectable digital filter characteristics
- 1 proprietary optimum transient digital filter
- Headphone output on the front (6.3mm)
- Synchronization of all internal oscillators
- Jitter as low as 100 Femtoseconds!
- Gold plated four layer PCB
- Full alu/metal sandwich casing in silver or black

Technical data

3 digital inputs 1x coax (S/PDIF), 1x optical (TOSlink®), USB B

D/A-converter 1x ESS903802M 32-bit PCM 768kHz / DSD256

Headphone amplifier chip ESS9063

Sampling rates 32/44,1/48/88,2/96/176,2/192/352,8/384/768 kHz

DSD support DSD64, DSD128, DSD256
Filter settings 5 different selectable on front

Frequency response 20Hz - 20kHz

Analogue out 6.3mm Headphone Out (front), 1x Pre Out (RCA)

103 x 37 x 120 mm

Output voltage 2,05 Veff
Headphone output power 68mW (320hms)

 THD
 0,0007%

 Dynamic Range
 120dBA

 Powerconsumption
 5V, micro USB

Dimensions W x H x D

Weight 366g without power supply

Head Box S2 Digital - High performance DAC and headphone amplifier

Head Box S2 Digital comes fully equipped for the highest demands of the modern audiophile. It supports playback for PCM files up to 32bit / 768kHz and DSD decoding up to quad DSD (DSD256). Head Box S2 Digital also comes with five digital filters for soundshaping to the listeners preferences. Three digital inputs ensure to connect to any source available, be it a personal computer via the USB input or a TV set via the optical input. The co-axial S/PDIF input takes all data from a digital transport such as the CD Box DS2 T. All inputs offer support for high resolution data up to 24bit /192kHz. The USB input offers full high resolution support for all files up to PCM 32/768 and DSD256. The front seated 6.35mm headphone output delivers a clean and precise sound with a musical touch. Unwanted noise coming in through USB is double filtered to surpress them to a level where it can't affect audio to realize an undisturbed listening experience. The new aluminium/metal casing ensures highest aesthetics and protects against vibration and interference! Head Box S2 Digital comes in silver or black.
